Online Hotel Room Booking System

Opportunity:

When we go on vacations to different cities or countries, we found it very difficult to find an accurate or good room for residence. It takes a lot of time and it's very hectic too.

Goal:

Online system will be beneficial for both customer and hotel. Customer will be able to register room online and can save a lot of time.

Customer can easily read feedback and can see pictures of room for authentication and satisfaction. And hotel will be benefited by advertisement.

Objectives:

- Save customer time and energy.
- Customer satisfaction.
- Feedback for authentication.

IN Scope:

By online room booking, customer can easily book his room. Online system will be more efficient and easy.

Business case:

It will create ease for customer which means more customers.

Constraints:

Internet connection is necessary for it.

Assumptions:

The customers will give honest feedback and rating.

Deliverables:

Easy room booking process.
